DIV. OF OIL, GAS & MINING

Dear Ms. White:

Re: Approval Request to Update Reclamation Bond for Little Mountain Quarry (Permit # M/045/005) and Quarry Antone (Permit # M/045/021)

This letter is to request an approval for the attached updated reclamation bond cost estimate for the Little Mountain Quarry (Permit # M/045/005) and Quarry Antone (Permit # M/045/021) both of which are located in Tooele County and owned by Lone Star Industries, Inc, a Delaware Corporation doing business as Buzzi Unicem USA.

These are currently suspended limestone and shale mining operations located west of Grantsville on the east slope of the Stansbury Mountains, which in the past have supported a commercial cement operation. They are relatively small: Little Mountain Quarry has approximately 23 disturbed acres (\$69,800 current bond) and Quarry Antone has approximately 13 disturbed acres (\$49,900 current bond). Based on our files, their reclamation estimates are due for adjustment by August 21, 2007. Lone Star Industries would like to extend the permits and bonds for these quarries. The remaining limestone and shale reserves on these and our surrounding properties are capable of supporting significant future operations; and we desire to retain the property position and the existing mining permits in good condition to preserve the future economic potential of these properties.

In the last five years since these estimates were updated in 2002, essentially nothing has changed at the sites. A recent inspection by us indicated both properties are stable from a safety and environmental perspective and do not require any mitigative measures at this time. We believe that only the equipment and labor unit rates, and the other DOGM "add ons" need to be updated in the reclamation estimates. This has been accomplished in the attached spreadsheet, which was prepared by Bill Fuller P.E., JBR Environmental Consultants. Following your review and approval of updated reclamation bond amounts for both projects, we will proceed with submitting the appropriate surety instruments. We understand from your July 11, 2007 meeting with Bill Fuller and Brian Buck that the Division has not established a compliance date for this updated surety to be in place but we will do everything we can to achieve this goal in a timely manner.

Thank you for your assistance with this matter and feel free to contact me with any questions you may have on this matter

Sincerely,

A handwritten signature in black ink that reads "Roderick Simmons". The signature is written in a cursive, flowing style.

Roderick Simmons
Director of Engineering and Construction Management
